The Concept of Multi-Function:

The concept of Multi-Function is to make one bag of components available to produce many different functioning locks (up to 6 different functions in Fort's single bitted bag). This enables the locksmith to carry fewer locks in inventory while still have complete stock on hand. Multi-Function bagged cam locks include Fort's patented Wonder Washer, which allows for installation into either wood or metal without the use of a double "D" punch.

LOCKS PROVIDED WITH PARTS FOR SIX DIFFERENT FUNCTIONS

UNIVERSAL KEYING MATRIX

Fort's 23000 series cam locks are designed with the Universal Keyway which accepts many other manufacturers' key blanks and will operate with their key code systems. (See chart at right)

This is important when you have another manufacturer's locking system in the field and you wish to build onto that existing system by adding locks made by Fort Lock and still use the same existing keys.
